Dear Mr Delpont

**EXTERNAL REVIEW OF CONTAMINATED LAND ASSESSMENT REPORT FOR MOOV ENERGY SITE
IN KRAAIFONTEIN**

We refer to report reference 17307C of Kantey and Templer titled "Phase 1 Due Diligence Assessment Report for Moov Energy, Kraaifontein Industria, Cape Town, Western Cape", Revision 0, dated July 2025.

JG Afrika (Pty) Ltd were requested to conduct an external report review by Kantey and Templer, where our senior contaminated land specialist and contaminated land lead submitted comments on 10 July 2025.

JG Afrika (Pty) Ltd confirm that the contaminated land assessment approach and methodology carried out by Kantey and Templer, aligns with recognised industry methodologies for a Phase 1 Due Diligence study for potentially hydrocarbon contaminated sites. We further confirm our agreement of the findings of the site assessment and contaminated land assessment report.

We trust this meets with your approval.

Yours Faithfully

for: **JG AFRIKA (PTY) LTD**

ROBERT SCHAPERS

Executive Associate
